Mimi Inu - Drinking Urine

Re ingesting urine or body fluid has proven to increase my immunity and it has reduce pain in throat instantly and reduce tooth ache and ingested and rubbed on a painful area of the body also reduces pain. I have taken medications antibiotics excreted it and the re ingested it as a way of looping it. Urinating on infected wounds can clean and clear infection. Urine is clean and can last a while out of the body it is accentually body fluid and makes up 80% of the body. The body should excrete mostly excess fluid but has become programmed to releasing things that the body needs, by re ingesting you are manually overriding any programming that has been done over time natural and unnatural processes. The taste should be water like, if it is bitter than medicines are being excreted. I plan to do more research around ingesting chemical compounds and water fasting for a couple weeks to see if i can increase some level in brain chemistry by rewriting my own natural production of the chemicals through consuming than re ingesting to the point that my body will no longer excreted these compounds and will only produce.

On the spiritual side I believe it has reverse the flow of chakra by fluid from the root directly to the pituitary gland instantly communicating with the whole body down to heart the fire, than to solar plex the air, to the stomach the earth and the root the water a cycle of the elements in reverse. It was used in warding off spirits in the old days and i have mixed it with soap powder to wash my clothes and it took all bad smells away.

I will update as I learn more.
